Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application,

☒ claims Nos. 1-7 (with respect to IA only)

because:

☒ the said international application, or the said claims Nos. 1-7 (with respect to IA) relate to the following subject matter which does not require an international preliminary examination (specify):

see separate sheet

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.

☐ no international search report has been established for the said claims Nos.

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.

☐ See separate sheet for further details

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 1-7 relate to a surgical method, i.e. to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following document/s/:

- D2: DATABASE WPI Section Ch, Week 200039 Derwent Publications Ltd., London, GB; Class B04, AN 2000-450059 & RU 2 139 070 C1 (SHENDEROV B A) 10 October 1999 (1999-10-10)

- D6: JONG ET AL: "Probiotics for human and animals" ATCC QUARTERLY NEWSLETTER, ROCKVILLE, MD, US, vol. 1, no. 13, 1993, pages 1-11, XP002072789 ISSN: 0894-9026

Unless stated differently, the relevant passages are those cited in the search report.

2. Novelty

D1 discloses a process for collecting bacteria using brushes, as well as isolating bacterias, and is novelty-destroying for claims 1, 2, 6 7 and 9.

3. Inventive Step

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

PCT/IB2004/002446

- 3.1. Claims 3-5 are not considered to be inventive, because the subject-matter of said dependent claims contains mere optimization and adaptation procedures of colonoscopy that the expert in the field would do without the use of inventive skill.
- 3.2. D2-D6 all disclose the use of bacteria isolated from the human intestine or faeces (although not isolated using the claimed process). D1 disclosing a process allowing for isolation and identification of intestinal bacteria, would make it obvious for the expert in the field to use the method of D1 in order to obtain bacteria for the uses of D2-D6. Furthermore, D2-D6 use the same kind of bacteria that are disclosed in the examples of the present application. Claims 8 and 10 are therefore not considered to be inventive.

3. Industrial application

For the assessment of the present claims 1-7 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
